2KMobile Link for Medisoft

2KMobile Link enables a physician to remotely schedule, view patient appointments and create superbills from any device with Internet access. These devices include cellular phones, pdas, tablet pcs, laptops, and desktop computers. The application offers real time remote access to a physician's medical practice management system for scheduling and creating superbills.

2KMOBILE LINK FEATURES:

- Supports Windows Mobile 5.0 for Smartphones and Pocket PC's.
- Supports any device with Internet Explorer 5.0 or higher.
- Supports Verisign SSL encryption (optional add on) and most firewalls including Sonic Wall (recommended), and Linksys.
- Secure real time remote access of patient information, appointments and billing from Medisoft with no delay or hotsync of data.
- No software installation on mobile devices.
- Create, view, and edit patient appointments.
- Create, view, and edit superbills.
- Create, view, and edit patient information.
- Create, view and edit diagnosis and cpt codes.
- Refined search by common diagnosis and cpt codes.

Please note any device with Windows Mobile 5.0 is supported by 2KMobile Link. Cell phones with Wi-Fi technology provide optimal performance.
